Application: Full Stack Engineer

Dear Clueso Hiring Team,

I am applying for the Full Stack Engineer (Frontend-Heavy) role in Bengaluru, and I am ready to relocate there for it. What draws me to Clueso is the Articles and SOP Editor: a core product surface, not isolated UI tasks, that I would get to own end to end alongside founders and designers. Mine is exactly that pattern: over three years of freelance work where I have owned full features from a blank repository to production systems serving paying clients.

How I match the posting:

- React and TypeScript in production: I built the frontend of a logistics platform from scratch (Next.js, TypeScript, Tailwind) with complex order, wallet, and commission state - 1,000+ orders processed across payment, payout, and refund screens, each built with attention to UX detail.
- State management in real products: Zustand and TanStack Query across shipped apps, plus WebSocket-driven state kept responsive under high-concurrency load on a real-time quiz platform.
- Full stack when the feature needs it: Express.js REST APIs, PostgreSQL and Prisma schemas, MongoDB with Mongoose, webhook and payment processing, and Docker deployment and CI/CD across my client work.

I will state one gap plainly: I have not worked with TipTap or ProseMirror. My strength is strong React and TypeScript fundamentals and component architecture in shipped products, and your posting values equivalent projects; I am ready to deep-dive into editor schemas, nodes, and plugins the same way I learned Redis and RabbitMQ when a client feature demanded them.

On the AI side, I already build with Claude Code in my development loop, and following how Clueso MCP extends into Claude, ChatGPT, and Cursor tells me the team treats AI workflows as product, not a feature checkbox. A YC Winter 2023 company whose product turns screen recordings into videos and step-by-step documentation for 1,000+ SaaS companies, fresh off a $10M Series A, is where a hands-on, own-it-fully builder should be.

Based in Mathura, Uttar Pradesh, I will relocate to Bengaluru and be on-site. I look forward to hearing from you.

Kind regards,

Gaurav Chaudhary
