Dear Dentsu Global Services Hiring Team,

I am writing to apply for your MERN Developer / Senior Software Engineer position. For over three years of freelance delivery I have built and run production platforms end to end in the MERN stack: MongoDB and Mongoose data layers, Express and Node.js services, React and TypeScript interfaces, and the CI/CD and monitoring that keep them live.

Dentsu is the integrated growth and transformation partner to the world's leading organizations, and Dentsu Global Services is its named global services arm, with India in its country network. Client work at that scale needs engineers who ship reliable MERN services independently; my freelance delivery is that pattern, with monitoring and production issues owned by me.

How I match your requirements:

- MERN in production: React and TypeScript interfaces with Material UI, plus Node.js and Express REST APIs, shipped across logistics, real-time quiz, and affiliate-tracking platforms with live users.
- MongoDB and SQL/NoSQL data layers: MongoDB with Mongoose, PostgreSQL with Prisma, and Redis, covering orders, ledgers, commissions, and lead tracking in live products.
- CI/CD and observability: Git and GitHub Actions pipelines deploying Docker containers, with Prometheus, Grafana, Loki, and Sentry for production monitoring and root cause debugging.
- Clean, maintainable code: TypeScript held to consistent standards across solo deliveries, backed by object-oriented and data-structures fundamentals from my ongoing B.Tech CSE studies.

I work directly with clients today: I take requirements through to deployed software and resolve production issues without anyone in between. I want to keep that ownership inside a larger engineering organization, where code reviews, shared standards, and technical discussions with cross-functional teams apply to every change. AI-assisted development with Claude Code keeps my delivery fast without giving up code quality.

I am based in Mathura and open to relocating to Bengaluru or Pune for this role.

I look forward to hearing from you.

Kind regards,

Gaurav Chaudhary
