Backend-weighted Full-Stack Developer (Node.js, TypeScript, Express.js, React, Next.js) with three years of freelance production delivery: features owned from client requirements through PostgreSQL schema, API design, deployment, and post-release monitoring. Production work covers payment and webhook pipelines, high-concurrency event handling with Redis and RabbitMQ, and monitoring with Prometheus, Grafana, and Loki. Ships with automated tests and GitHub Actions CI/CD; uses Claude Code daily and is deliberately moving toward agent tooling and LLM-backed features. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **Backend Services**: Node.js, Express.js, TypeScript, REST, JWT, webhook processing - production APIs for logistics, quiz, and affiliate platforms.
- **Databases**: PostgreSQL, MySQL, MongoDB with Prisma and Mongoose; schema design for order, ledger, commission, and fraud-detection systems, including migrations on live data.
- **Frontend**: React, Next.js, TypeScript, Tailwind CSS, TanStack Query - dashboards and customer-facing UI shipped alongside the APIs.
- **Testing & CI/CD**: automated tests, GitHub Actions, Docker, AWS EC2, NGINX, Linux - commit to production owned end to end.
- **Monitoring & Observability**: Prometheus, Grafana, Loki, and Sentry - dashboards, log aggregation, and error tracking on systems running in production.
- **Real-Time & Background Processing**: WebSockets/Socket.IO, Redis, RabbitMQ, Node.js Cluster for high-concurrency event handling and queued background jobs.
- **AI-Assisted Development**: Claude Code as the daily tool for implementation, review, and refactoring; deliberate focus on agent tooling and LLM-backed features.

Professional Experience

Cashbackwallah — **Remote / client project**
Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, TypeScript, Express.js, Prisma, PostgreSQL): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
- Owned features end to end: requirements with the client, schema and API design, integration work, deployment, and monitoring after release.
- Designed the money-movement services: Razorpay payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, scheduled refund workflows, and webhook processing.
- Integrated Shiprocket and Firebase OTP, kept Redis and Sentry on the production stack, and handled end-to-end deployment and DevOps. Demo: cashbackwallah.com

Dream10.in — **Remote / client project**
Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment/payout processing.
- Built fault-tolerant services for high-concurrency event handling; managed CI/CD deployment and real-time WebSocket communication. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2024), still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook/postback handling, payment processing, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, and contest timers.
  - Docker-sandboxed code execution service with testcase management and customizable coding rooms.

- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge.
- **4th place** - WebForge.
- **4th place** - Code Arambh.
- **LeetCode** - 1,430 contest rating.
