LinkedIn, GitHub, Portfolio

Backend-focused Full-Stack Developer (Node.js, Express.js, TypeScript, PostgreSQL) with over three years of freelance production delivery: REST APIs, payment-provider integrations, webhook-driven order flows, Redis and RabbitMQ queues, and scheduled jobs. Owns services end to end, from schema design through deployment, monitoring, and production debugging, with a reliability and data-quality mindset built on systems real customers use every day. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **Backend APIs & Services**: Node.js, Express.js, TypeScript, REST, JWT authentication and role-based access - production APIs behind logistics, quiz, and affiliate lead-tracking platforms.
- **Payments & Integrations**: Razorpay (signature verification, payouts, refunds), Shiprocket, Firebase OTP, Auth0, Paytm, webhook/postback processing - wallets, transaction ledgers, and KYC-gated flows.
- **Queues, Jobs & Events**: Redis, RabbitMQ, Node.js Cluster - background job processing, scheduled refund workflows, and high-concurrency event handling.
- **Databases & Data Quality**: PostgreSQL, MySQL, MongoDB with Prisma and Mongoose; schema design for order, ledger, and commission systems; validation on live data.
- **Reliability, Latency & Observability**: production debugging, automated fraud detection, Redis-backed caching for latency, Sentry error tracking, Prometheus, Grafana, and Loki monitoring on running services.
- **DevOps**: Docker, NGINX, GitHub Actions, CI/CD, AWS EC2, Linux - pipelines owned from commit to production.
- **Frontend (supporting)**: React, Next.js, Tailwind CSS - enough depth to pair with frontend teams on API contracts.

Professional Experience

Cashbackwallah **Remote / client project**
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built the backend of a production logistics platform from scratch (Express.js, TypeScript, Prisma, PostgreSQL): shipment booking APIs, order management, and a multi-level franchise commission system - 1,000+ orders processed.
- Integrated payment and third-party providers: Razorpay payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, webhook processing, and scheduled refund workflows.
- Ran reliability work on live services: Sentry error tracking, Redis-backed caching and job queues, and production debugging across 1,000+ live orders.
- Handled end-to-end deployment and DevOps for the platform. Demo: cashbackwallah.com

Dream10.in **Remote / client project**
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Built backend services for a production real-time quiz platform (Node.js, Redis, RabbitMQ, WebSockets): automated payment/payout processing, live leaderboards, and anti-cheat mechanisms.
- Built fault-tolerant services for high-concurrency event handling; managed CI/CD deployment. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2023), still maintained and extended on demand: webhook/postback handling, automated fraud detection, payment processing, real-time dashboards, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, Node.js, Express, Docker): contest and testcase management with invite-based rooms.
  - Docker-sandboxed code execution backend over WebSockets with CRDT-based real-time multi-user editing.
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.
- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): automated payouts and reward distribution.
  - First end-to-end payment integration, built and run in production while in high school.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge.
- **4th place** - WebForge; **4th place** - Code Arambh.
- **LeetCode** - 1,430 contest rating.
- **AWS Cloud Computing Certification** - JOVAC, GLA University (2025).
