LinkedIn, GitHub, Portfolio

Full-Stack Developer (MERN) with over three years of freelance production delivery: TypeScript and JavaScript across a React and Next.js frontend, Node.js and Express backend, and Postgres and MongoDB data layers. Owns platforms end to end, from REST APIs and webhook and payment pipelines through GitHub Actions CI/CD, Docker deployment, and Prometheus and Grafana monitoring. Shipped SaaS-style products with role-based access control, real-time dashboards, and direct client ownership of production issues. B.Tech CSE (in progress, expected 2027).

Core Competencies

- **MERN Stack Development**: React, Next.js, TypeScript, JavaScript, Node.js, Express - interfaces, REST APIs, and backend services for logistics, edtech, and affiliate-tracking products.
- **Component Libraries & UI**: Material UI, Tailwind CSS, Zustand, TanStack Query - responsive, high-quality interfaces built to client requirements and held to production quality.
- **Databases & APIs**: PostgreSQL, MongoDB, MySQL, Redis with Prisma and Mongoose; REST, GraphQL, WebSockets - schema design for orders, ledgers, commissions, and lead tracking.
- **CI/CD & Deployment**: Git, GitHub Actions, Docker, AWS EC2, NGINX, Linux - automated pipelines and containerized deployment of production applications.
- **Monitoring & Observability**: Prometheus, Grafana, Loki, Sentry - dashboards, alerting, and root cause debugging on live systems.
- **Production Ownership**: direct client ownership from requirements through deployment and production support; AI-assisted development with Claude Code.

Professional Experience

Cashbackwallah — **Remote / client project**
Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, React, TypeScript, Express.js, Prisma, PostgreSQL): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
- Integrated Shiprocket, Razorpay, Firebase OTP, Redis, and Sentry: payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, webhook processing, scheduled refund workflows.
- Handled end-to-end deployment and DevOps for the platform, including production monitoring with Sentry.
- Worked directly with the client on requirements and production issues. Demo: cashbackwallah.com

Dream10.in — **Remote / client project**
Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment and payout processing.
- Built fault-tolerant services for high-concurrency event handling and managed CI/CD deployment, including Redis and RabbitMQ-based processing and real-time WebSocket communication. Demo: dream10.in

Lead Tracking System — **Remote / client project**
Freelance Full-Stack Developer (Ongoing Maintenance) — *May 2023 - Present*

- Built a production affiliate lead-tracking platform in 2023, still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook and postback handling, payment processing, Telegram alerts, and role-based access control.
- Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in
- Continue to own it as a live client engagement: resolving production issues and shipping extensions on request.

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, contest timers, and testcase management.
  - Docker-sandboxed code execution service with customizable coding rooms.

- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.

- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): task-based earnings, referral system, scratch cards, and automated reward distribution.
  - First end-to-end payment integration built, including payouts through Paytm and OpenMoney. Demo: earningarea.org

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024).
- **4th place** - WebForge (2025).
- **4th place** - Code Arambh (2024).
- **AWS Cloud Computing** - certification, JOVAC (2025).
- **LeetCode** - 1,430 contest rating.
