Frontend Developer with over three years of freelance production delivery: React and Next.js interfaces in TypeScript and modern JavaScript (ES6+), responsive production UI with Tailwind CSS and Material UI, state management with Zustand and TanStack Query, and RESTful API integration. Front ends shipped for a logistics platform processing 1,000+ orders, a real-time quiz platform with live leaderboards, affiliate tracking dashboards, and a collaborative code editor, with server-side rendering through Next.js and production error monitoring with Sentry. Uses Claude Code for AI-assisted development. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **React.js & Modern JavaScript**: React, Next.js, JavaScript (ES6+), TypeScript - component-based user-facing features built and maintained in production.
- **State Management & RESTful APIs**: Zustand for global state and TanStack Query for server cache, covering client state, server cache, and re-fetch logic; RESTful API integration with request handling, caching, and error states.
- **Authentication & API Integration**: JWT-based authorization and authentication flows, Firebase OTP, Auth0, webhook processing, and role-based access control wired into React interfaces.
- **Responsive UI & Styling**: Tailwind CSS, Material UI, HTML5, CSS3 - responsive, cross-browser layouts built from client and design requirements.
- **MERN Stack Delivery**: MongoDB, Express.js, React, Node.js - owns features from UI through API and database.
- **SSR & UI Performance**: Next.js server-side rendering; WebSockets-driven live views and performance work on data-heavy dashboards and leaderboards.
- **Version Control & Delivery**: Git, GitHub Actions CI/CD, Docker - clean, versioned code shipped end to end.

Professional Experience

Cashbackwallah **Remote / client project**
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built and deployed a production logistics front end from scratch (Next.js, React, TypeScript): courier rate comparison, shipment booking, order management, and multi-level franchise commission views - 1,000+ orders processed.
- Owned customer-facing screens end to end: KYC-gated order placement, wallet and transaction views, payout and refund screens, and webhook-driven status updates, delivered responsively.
- Integrated REST APIs and third-party services into the React UI: Shiprocket, Razorpay (signature verification, payouts, refunds), Firebase OTP; monitored production errors with Sentry.
- Handled end-to-end deployment and DevOps for the platform. Demo: cashbackwallah.com

Dream10.in **Remote / client project**
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz interface to partners (Next.js, React, WebSockets): live leaderboards updating under event traffic, anti-cheat flows, and payment and payout screens.
- Built the fault-tolerant services behind the interface and managed CI/CD deployment. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2023), still maintained and extended on demand: real-time dashboards, fraud-detection views, webhook and postback handling, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; kept live dashboards observable with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, customizable coding room layouts, contest timers.
  - Docker-sandboxed code execution with testcase and contest management.
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage, resumable uploads, secure file sharing, search, pagination, folder organization.
- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): task-based earnings, referral system, scratch cards, and automated reward distribution.
  - First end-to-end payment integration built, including payouts through Paytm and OpenMoney. Demo: earningarea.org

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge.
- **4th place** - WebForge.
- **4th place** - Code Arambh.
- **LeetCode** - 1,430 contest rating.
