Full-Stack Developer delivering production systems in React and Node.js: responsive React and Next.js front-ends in TypeScript and modern JavaScript, and Express.js back-ends with RESTful APIs, third-party integrations, and SQL/NoSQL schema design. Over three years of freelance delivery owning platforms end to end: client requirements, architecture, deployment, and monitoring. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **React Front-End Development**: React, Next.js, TypeScript, Tailwind CSS, Material UI - responsive production interfaces across logistics, quiz, and affiliate-tracking platforms.
- **Node.js Back-End Development**: Node.js, Express.js, RESTful APIs, JSON - server-side services plus third-party integrations (Razorpay, Shiprocket, Firebase OTP, Telegram Bot API) and webhook processing.
- **Advanced JavaScript**: ES6+ (modules, async/await, closures) and TypeScript as the primary language across freelance delivery.
- **State Management**: Zustand, TanStack Query - client state, server caching, and API contracts across React applications.
- **Databases & Schema Design**: PostgreSQL, MongoDB, MySQL with Prisma and Mongoose; relational and NoSQL schema design for orders, wallets, and commissions.
- **Performance & Responsive Design**: WebSockets/Socket.IO and Redis-backed data flows - live dashboards and leaderboards that stay responsive under concurrent load.
- **Clean Code & Version Control**: Git, GitHub Actions CI/CD, Docker - maintainable, versioned code with deployment owned end to end.
- **AI-Augmented Development**: Claude Code as part of the development workflow - code generation, testing, and debugging.

Professional Experience

Cashbackwallah **Remote / client project**
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, React, TypeScript, Express.js, PostgreSQL with Prisma): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
- Designed the relational schema and REST API layer for orders, wallets, and commissions, and integrated Shiprocket, Razorpay, Firebase OTP, Redis, and Sentry: payment signature verification, KYC-gated orders, automated payouts, webhook processing, scheduled refund workflows.
- Owned customer-facing React flows responsively: KYC-gated order placement, wallet and transaction views, payout and refund screens, webhook-driven status updates.
- Worked directly with the client on scope and milestones; handled end-to-end deployment and DevOps for the platform. Demo: cashbackwallah.com

Dream10.in **Remote / client project**
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment/payout processing.
- Built fault-tolerant Node.js services for high-concurrency event handling and real-time WebSocket communication; managed CI/CD deployment. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2023), still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook/postback handling, payment processing, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, contest timers, and testcase management.
  - Docker-sandboxed code execution service with customizable coding rooms. Demo: codelab.logicpay.in
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage, resumable uploads, and Telegram-backed distributed storage.
  - Secure file sharing with search, pagination, and folder organization. Demo: datavault-two.vercel.app
- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): task-based earnings, referral system, scratch cards, and automated reward distribution.
  - First end-to-end payment integration built, including payouts through Paytm and OpenMoney. Demo: earningarea.org

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge.
- **4th place** - WebForge.
- **4th place** - Code Arambh.
- **AWS Cloud Computing Certification** - JOVAC (2025), GLA University.
- **LeetCode** - 1,430 contest rating.
