Full-Stack Developer working in the MERN stack (React, Node.js, Express.js, MongoDB, TypeScript) with over three years of freelance production delivery: RESTful APIs, responsive React frontends, and data-intensive backends, owned end to end from database schema through CI/CD deployment and production monitoring. Develops AI-augmented daily with Claude Code for coding, testing, and debugging. Shipped platforms processing 1,000+ orders and high-concurrency real-time systems backed by Redis and RabbitMQ, with monitoring using Prometheus, Grafana, and Sentry. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **MERN Stack Full-Stack Execution**: React, Next.js, Node.js, Express.js, MongoDB, TypeScript, JavaScript (ES6+) - shipping features across the entire stack, from component-based React frontends to data-intensive backends.
- **Backend Depth (Node.js & MongoDB)**: Mongoose schema design for order, ledger, commission, and fraud-detection systems; PostgreSQL and MySQL alongside MongoDB.
- **AI-Augmented Engineering**: develops daily with Claude Code as a core part of the development lifecycle - code generation, test acceleration, and faster debugging in a continuous delivery rhythm.
- **DevOps & Engineering Rigor**: Git workflows, GitHub, GitHub Actions, CI/CD pipelines, Docker, AWS EC2, NGINX, Linux server management - clean, testable services from commit to production.
- **Real-Time & Background Processing**: WebSockets/Socket.IO, Redis, RabbitMQ, Node.js Cluster for high-concurrency event handling, live leaderboards, and queued background jobs.
- **Scale & Optimize**: monitoring with Prometheus, Grafana, Loki, and Sentry; performance troubleshooting on production systems with a growing user base.
- **Payments & Integrations**: Razorpay (signature verification, payouts, refunds), Shiprocket, Firebase OTP, webhook/postback processing, wallet and transaction ledgers.

Professional Experience

- **Cashbackwallah** — **Remote / client project**
  Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*
  - Architected and deployed a production logistics platform from scratch (Next.js, React, TypeScript, Express.js, PostgreSQL with Prisma): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
  - Designed backend services and RESTful APIs for payments and money movement: Razorpay signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, scheduled refund workflows, and webhook processing.
  - Monitored the production system: Redis caching and Sentry error tracking across order and ledger data.
  - Owned end-to-end deployment and DevOps for the platform. Demo: cashbackwallah.com

- **Dream10.in** — **Remote / client project**
  Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*
  - Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment/payout processing.
  - Built fault-tolerant services for high-concurrency event handling; managed CI/CD deployment and real-time WebSocket communication. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2024), still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook/postback handling, payment processing, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, and contest timers.
  - Docker-sandboxed code execution service with testcase management and customizable coding rooms.

- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): Mongoose schema design for chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** – WebX Frontend Challenge.
- **4th place** – WebForge.
- **4th place** – Code Arambh.
- **LeetCode** – 1,430 contest rating.
