LinkedIn, GitHub, Portfolio

React.js Front-End Developer with over three years of freelance production delivery: React and Next.js interfaces in JavaScript (ES6+) and TypeScript, hooks-based state management with Zustand and TanStack Query, REST API integration, and responsive UI with Tailwind CSS and Material UI. Front ends shipped for a logistics platform processing 1,000+ orders, real-time leaderboards, and a collaborative code editor, with performance and error monitoring on live dashboards. Uses Claude Code for AI-assisted development. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

## Core Competencies

- **React & JavaScript (ES6+)**: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3 - component-based user-facing features built and maintained in production.
- **State Management & REST**: React Hooks with Zustand and TanStack Query for client and server state (the same container and pattern thinking Redux provides, applied with a different library); RESTful API integration with request handling, caching, and error states.
- **Responsive & Cross-Browser UI**: Tailwind CSS and Material UI - UI/UX designs translated into responsive layouts delivered across devices and browsers.
- **Component Reuse & Performance**: reusable components across order, quiz, and dashboard screens; performance work on data-heavy views such as live leaderboards and real-time dashboards.
- **AI-Augmented Engineering**: Claude Code as part of the development workflow - code generation, testing, and debugging.
- **Code Quality & Delivery**: Git version control, clean and documented code, iterative milestone-based delivery with clients.

## Professional Experience

**Cashbackwallah** — **Remote / client project**
*Freelance Full-Stack Developer* — *Jan 2026 - Aug 2026*

- Built and deployed the production logistics front end from scratch (Next.js, React, TypeScript, Tailwind CSS): courier rate comparison, shipment booking, order management, and multi-level franchise commission views - 1,000+ orders processed.
- Integrated REST APIs and third-party services into the React UI: Shiprocket, Razorpay (signature verification, payouts, refunds), Firebase OTP; wallet and transaction ledger views, KYC-gated orders, webhook-driven status updates.
- Delivered responsive, reusable components across order, shipment, and admin screens; tracked UI errors in production with Sentry.
- Owned end-to-end delivery and deployment (GitHub Actions CI/CD, Docker, AWS EC2, NGINX). Demo: cashbackwallah.com

**Dream10.in** — **Remote / client project**
*Freelance Full-Stack Developer* — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz interface to partners (Next.js, React, WebSockets): live leaderboards updating under event traffic, anti-cheat flows, and payment and payout screens.
- Built the fault-tolerant services behind the interface and managed CI/CD deployment. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  *Freelance Full-Stack Developer (Ongoing Maintenance)* *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2024), still maintained and extended on demand: real-time dashboards, fraud-detection views, webhook and postback data, Telegram alerts, role-based access control.
  - Kept performance and observability on live dashboards with Prometheus, Grafana, and Loki. Demo: panel5.logic-pay.in

## Independent Projects

- **Independent project**
  *CodeLab* *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, customizable coding room layouts, contest timers.
  - Docker-sandboxed code execution with testcase and contest management.
- **Independent project**
  *Data Vault* *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage, Telegram-backed distribution, resumable uploads, secure file sharing.
  - Search, pagination, and folder organization across stored files; resumable uploads continue after an interrupted transfer.

## Education

- **GLA University** **Mathura, India**
  *B.Tech in Computer Science and Engineering* *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

## Languages

- Hindi (native), English (professional working proficiency) - the working language for CVs, cover letters, code, and client communication.

## Honors and Awards

- **Finalist** - WebX Frontend Challenge.
- **4th place** - WebForge.
- **4th place** - Code Arambh.
- **LeetCode** - 1,430 contest rating.
