Frontend-focused Full-Stack Developer with three years of freelance production delivery building React and Next.js interfaces in TypeScript and modern JavaScript (ES6+): responsive, production-grade UIs with Tailwind CSS and Material UI, state management with Zustand and TanStack Query, and real-time interfaces that stay responsive under concurrent event loads. Works directly with clients to turn requirements into shipped interfaces, owning frontend delivery from components through deployment. Final-year B.Tech CSE student (expected 2027) with live products in front of real users: logistics dashboards, real-time quiz leaderboards, and tracking panels.

Core Competencies

- **React Frontend Development**: React, Next.js, TypeScript, component-based architecture - production interfaces across logistics, edtech quiz, and affiliate-tracking platforms.
- **Modern JavaScript**: ES6+ (classes, modules, async/await, closures) as the daily language across every project shipped.
- **Tailwind CSS & Responsive Design**: Tailwind CSS, Material UI, HTML5, CSS - responsive interfaces built from client and design requirements for real users.
- **Real-Time & Performance**: WebSockets/Socket.IO, Redis-backed data flows - live leaderboards and dashboards kept responsive under high-concurrency event handling.
- **State & Data Flow**: Zustand, TanStack Query, REST APIs - client state, server caching, and the API contracts behind every interface.
- **Full-Stack Context**: Node.js, Express.js, PostgreSQL, MongoDB - owns features from UI through API and database.
- **Engineering Rigor**: Git, GitHub Actions CI/CD, Docker - clean, maintainable, versioned code owned end to end.

Professional Experience

Cashbackwallah **Remote / client project**
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, React, TypeScript, Express.js, PostgreSQL with Prisma): courier rate comparison, shipment booking, order management, and multi-level franchise commission views - 1,000+ orders processed.
- Owned the customer-facing interface end to end: KYC-gated order placement, wallet and transaction views, payout and refund screens, and webhook-driven status updates, delivered responsively.
- Integrated Shiprocket, Razorpay, Firebase OTP, Redis, and Sentry across the platform: payment signature verification, wallet and transaction ledger, automated payouts, and scheduled refund workflows.
- Worked directly with the client to translate requirements into shipped UI; handled deployment and DevOps for the platform. Demo: cashbackwallah.com

Dream10.in **Remote / client project**
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat flows, and payment/payout screens.
- Built real-time WebSocket UI updates and fault-tolerant services for high-concurrency event handling; managed CI/CD deployment. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2024), still maintained and extended on demand: real-time dashboards, fraud-detection views, webhook/postback handling, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, and contest timers.
  - Docker-sandboxed code execution service with testcase management and customizable coding rooms.
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge.
- **4th place** - WebForge.
- **4th place** - Code Arambh.
- **LeetCode** - 1,430 contest rating.
