LinkedIn, GitHub, Portfolio

Backend-leaning Full-Stack Developer (Node.js, TypeScript, Express.js) with three years of freelance production delivery: REST APIs, payment and webhook pipelines, and high-concurrency event systems backed by Redis and RabbitMQ. Owns services end to end, from PostgreSQL/MySQL/MongoDB schema through Docker, CI/CD pipelines, and Linux server management, with production monitoring using Prometheus, Grafana, and Sentry. Works directly with clients on scope and trade-offs, taking features from design to a deployed, monitored service without hand-offs. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

## Core Competencies

- **REST APIs & Backend Services**: Node.js, Express.js, TypeScript, REST, JWT, webhook processing - production APIs for logistics, quiz, and affiliate platforms, consumed by web and mobile clients.
- **Databases**: PostgreSQL, MySQL, MongoDB with Prisma and Mongoose; schema design for order, ledger, commission, and fraud-detection systems, including migrations on live data.
- **DevOps & Server Infrastructure**: Docker, Git, GitHub, GitHub Actions, CI/CD, AWS EC2, NGINX, Linux server management - deployment pipelines owned end to end, from commit to production.
- **Real-Time & Background Processing**: WebSockets/Socket.IO, Redis, RabbitMQ, Node.js Cluster for high-concurrency event handling, live leaderboards, and queued background jobs.
- **Payments & Integrations**: Razorpay (signature verification, payouts, refunds), Shiprocket, Firebase OTP, webhook/postback processing, wallet and transaction ledgers.
- **Monitoring & Observability**: Prometheus, Grafana, Loki, and Sentry - dashboards, log aggregation, and error tracking on production systems.
- **Frontend (supporting)**: React, Next.js, TypeScript, Tailwind CSS - enough front-end depth to pair with frontend and mobile teams on API contracts and UI integration.

## Professional Experience

- **Cashbackwallah** — **Remote / client project**
  *Freelance Full-Stack Developer* — *Jan 2026 - Aug 2026*
  - Built and deployed a production logistics platform from scratch (Next.js, TypeScript, Express.js, Prisma, PostgreSQL): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
  - Designed the payment and money-movement services: Razorpay payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, scheduled refund workflows, and webhook processing.
  - Integrated third-party APIs and external services (Shiprocket, Firebase OTP), with Redis and Sentry on the production stack.
  - Handled end-to-end deployment and DevOps for the platform. Demo: cashbackwallah.com

- **Dream10.in** — **Remote / client project**
  *Freelance Full-Stack Developer* — *Mar 2025 - Nov 2025*
  - Shipped a production real-time quiz platform to partners (Next.js, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment/payout processing.
  - Built fault-tolerant services for high-concurrency event handling; managed CI/CD deployment and real-time WebSocket communication. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  *Freelance Full-Stack Developer (Ongoing Maintenance)* *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2024), still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook/postback handling, payment processing, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

## Independent Projects

- **Independent project**
  *CodeLab* *Jun 2025*
  - Collaborative coding platform (Next.js, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, and contest timers.
  - Docker-sandboxed code execution service with testcase management and customizable coding rooms.

- **Independent project**
  *Data Vault* *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.

## Education

- **GLA University** **Mathura, India**
  *B.Tech in Computer Science and Engineering* *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

## Languages

- Hindi (native), English (professional working proficiency).

## Honors and Awards

- **Finalist** – WebX Frontend Challenge.
- **4th place** – WebForge.
- **4th place** – Code Arambh.
- **LeetCode** – 1,430 contest rating.
