LinkedIn, GitHub, Portfolio

Backend-leaning Full-Stack Developer (Node.js, TypeScript, Express.js) with over three years of freelance production ownership: payment and webhook pipelines, high-concurrency event systems on Redis and RabbitMQ, and production monitoring with Prometheus, Grafana, and Loki. Ships products end to end, from MongoDB/PostgreSQL schema through Docker, CI/CD, and Linux deployment, using Claude Code for coding, testing, and debugging. Drawn to the interfaces where agents talk to databases. Polyglot interest across Java, Python, SQL, and PHP. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **Backend Services**: Node.js, Express.js, TypeScript, REST, JWT, webhook processing - scalable, high-availability production APIs for logistics, quiz, and affiliate platforms, consumed by web and mobile clients.
- **Databases**: MongoDB, PostgreSQL, MySQL with Mongoose and Prisma; schema design for order, ledger, commission, and fraud-detection systems, including migrations on live data.
- **Real-Time & Background Processing**: WebSockets/Socket.IO, Redis, RabbitMQ, Node.js Cluster for high-concurrency event handling, live leaderboards, and queued background jobs.
- **DevOps & Observability**: Docker, GitHub Actions, CI/CD, AWS EC2, NGINX, Linux server management; Prometheus, Grafana, Loki, and Sentry dashboards and alerting on production systems.
- **AI-Augmented Development**: Claude Code used for coding, testing, and debugging across TypeScript codebases, with a hands-on interest in how agents interface with databases.
- **Payments & Integrations**: Razorpay (signature verification, payouts, refunds), Shiprocket, Firebase OTP, webhook/postback processing, wallet and transaction ledgers.
- **Frontend (supporting)**: React, Next.js, TypeScript, Tailwind CSS - enough front-end depth to ship complete products solo.

Professional Experience

Cashbackwallah — **Remote / client project**
Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, TypeScript, Express.js, Prisma, PostgreSQL): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
- Designed the payment and money-movement services: Razorpay payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, scheduled refund workflows, and webhook processing.
- Integrated third-party APIs and external services (Shiprocket, Firebase OTP), with Redis and Sentry on the production stack.
- Handled end-to-end deployment and DevOps for the platform. Demo: cashbackwallah.com

Dream10.in — **Remote / client project**
Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment/payout processing.
- Built fault-tolerant services for high-concurrency event handling; managed CI/CD deployment and real-time WebSocket communication. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2024), still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook/postback handling, payment processing, Telegram alerts, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage, resumable uploads, and Telegram-backed distributed storage.
  - Secure file sharing with search, pagination, and folder organization.

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, and contest timers.
  - Docker-sandboxed code execution service with testcase management and customizable coding rooms.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist**, WebX Frontend Challenge.
- **4th place**, WebForge.
- **4th place**, Code Arambh.
- **LeetCode**, 1,430 contest rating.
