Frontend developer with over three years of freelance production delivery: React and Next.js interfaces in JavaScript (ES6+) and TypeScript, hooks-based component architecture, client and server state with Zustand and TanStack Query, and performance work on data-heavy views such as live leaderboards and real-time dashboards. Ships user-facing systems end to end, supported by the Node.js APIs those interfaces consume. B.Tech CSE (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **React & JavaScript (ES6+)**: React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3 - component-based interfaces built, maintained, and shipped to production.
- **Component Architecture & State**: hooks, props, state, and data flow across reusable component systems for order, quiz, and dashboard screens; client and server state handled with Zustand and TanStack Query.
- **Performance & Production Debugging**: performance work on data-heavy frontend views (live leaderboards, real-time dashboards); frontend issues debugged in the browser with devtools, live UI errors surfaced and fixed with Sentry monitoring.
- **Real-Time Interfaces**: WebSocket-driven UI that stays responsive under high-concurrency event traffic (live quiz leaderboards, real-time tracking dashboards).
- **Backend (secondary)**: Node.js, Express.js, REST, PostgreSQL, MongoDB, Redis - the APIs and data layers behind my interfaces, built when the frontend needs them.
- **Delivery & Tooling**: Git, CI/CD, Docker, clean and maintainable code, iterative milestone-based delivery with clients, Claude Code in the build-and-debug workflow.

Professional Experience

- **Cashbackwallah** — **Remote / client project**
  Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*
  - Built and deployed the production logistics frontend from scratch (Next.js, React, TypeScript, Tailwind CSS): courier rate comparison, shipment booking, order management, and multi-level franchise commission views - 1,000+ orders processed.
  - Integrated third-party services into the React UI (Shiprocket, Razorpay, Firebase OTP): wallet and transaction ledger views, KYC-gated order flows, webhook-driven shipment status updates.
  - Delivered responsive, reusable components across order, shipment, and admin screens; tracked and fixed live UI errors with Sentry.
  - Owned end-to-end delivery and deployment (GitHub Actions CI/CD, Docker, AWS EC2, NGINX). Demo: cashbackwallah.com
- **Dream10.in** — **Remote / client project**
  Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*
  - Shipped a production real-time quiz interface to partners (Next.js, React, WebSockets): live leaderboards updating under event traffic, anti-cheat flows, and payment and payout screens.
  - Built the fault-tolerant backend services behind the interface and managed CI/CD deployment. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2023), maintained and extended since: real-time dashboards, fraud-detection views, webhook and postback handling, role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; kept live dashboards observable with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Yjs CRDT, WebSockets): real-time multi-user editing, customizable coding room layouts, and contest timers.
  - Docker-sandboxed code execution with testcase and contest management.
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, React, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage, resumable uploads, secure file sharing, search, and pagination.
- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): task-based earnings, referral system, scratch cards, and automated reward distribution - my first end-to-end payment integration.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency) - the working language for CVs, cover letters, code, and client communication.

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024).
- **4th place** - WebForge (2025); **4th place** - Code Arambh (2024).
- **LeetCode** - 1,430 contest rating.
