LinkedIn, GitHub, Portfolio

Frontend developer with over three years of freelance production delivery building React and Next.js interfaces in TypeScript, HTML5, and CSS3 for platforms with real users. Translates designs and client requirements into reusable components and UI-heavy features, and connects them to the backend through REST APIs and webhook integrations. Shipped logistics, real-time quiz, and affiliate-tracking products end to end, working remote from Mathura. Final-year B.Tech CSE student (expected 2027) with a strong DSA foundation (LeetCode 1,430 contest rating).

Core Competencies

- **React & TypeScript (primary)**: React, Next.js, TypeScript, modern JavaScript (ES6+), HTML5, CSS3 - component-based interfaces shipped across logistics, edtech, and affiliate-tracking platforms.
- **Reusable Components & UI Systems**: Tailwind CSS, Material UI, Zustand, TanStack Query - shared components for dashboards, multi-step flows, and form-heavy screens.
- **REST APIs & Webhooks**: webhook and postback processing, payment signature verification, third-party integrations (Shiprocket, Razorpay, Firebase OTP, Auth0) wired into the UI.
- **Performance & Real-Time Interfaces**: WebSockets/Socket.IO and Redis-backed data flows - live leaderboards and dashboards that stay responsive under concurrent event loads.
- **Node.js (secondary)**: Node.js and Express.js backends behind the frontends above, including API contracts, JWT auth, and background processing.
- **Build, Versioning & Tooling**: Git versioning, GitHub Actions CI/CD, Docker, NGINX - build pipelines and deployment owned end to end.
- **AI-Assisted Workflow**: uses Claude Code in the development workflow for scaffolding, refactoring, and review passes on production code.

Professional Experience

Cashbackwallah — **Remote / client project**
Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*

- Owned the interface of a production logistics platform, built from scratch (Next.js, React, TypeScript, Tailwind CSS): courier rate comparison, shipment booking, order management, and multi-level franchise commission views - 1,000+ orders processed.
- Translated client requirements into reusable components: KYC-gated order placement, wallet and transaction views, payout and refund screens, and webhook-driven shipment status updates.
- Wired the frontend to REST APIs and integrations (Shiprocket, Razorpay, Firebase OTP, Redis, Sentry) covering payment verification, ledgers, and refund workflows; handled deployment. Demo: cashbackwallah.com

Dream10.in — **Remote / client project**
Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat flows, and payment/payout screens.
- Built WebSocket-driven UI updates that stayed responsive during high-concurrency events; managed the CI/CD pipeline. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built an affiliate lead-tracking platform (2023), maintained and extended ever since: real-time dashboards, fraud-detection views, webhook/postback handling, Telegram alerts, and role-based access control.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, customizable layouts, and contest timers.
  - Docker-sandboxed code execution service with testcase management and coding rooms.

- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, React, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024).
- **4th place** - WebForge (2025).
- **4th place** - Code Arambh (2024).
- **LeetCode** - 1,430 contest rating.
