LinkedIn, GitHub, Portfolio

Full-Stack Developer with over three years of remote freelance production delivery: React and Next.js interfaces with TypeScript, REST APIs in Node.js and Express, and SQL and document databases, with Python from a core CS and scripting background. Ships products end to end with AI-assisted development: schema and API design, GitHub Actions CI/CD, deployment, monitoring, and direct client support on client platforms with live users; own products in production: CodeLab, Data Vault, and Earning Area. B.Tech CSE (in progress, expected 2027).

Core Competencies

- **ReactJS & Web Applications**: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Material UI - interfaces for logistics, real-time quiz, and affiliate-tracking platforms.
- **Python & Programming Principles**: Python, Java, SQL, PHP from core CS and scripting work; DSA foundation (LeetCode 1,430 contest rating); OOP, DBMS, and systems coursework.
- **REST APIs & Databases**: Node.js, Express, REST, GraphQL, WebSockets; PostgreSQL, MongoDB, MySQL, Redis with Prisma and Mongoose - schema design for orders, ledgers, commissions, and leads.
- **Payments & Integrations**: Razorpay (signature verification, wallets, payouts, refunds), Shiprocket, Firebase OTP, webhook and postback processing, KYC-gated orders.
- **Product Ownership**: builds and runs own live products (CodeLab, Data Vault, Earning Area) alongside client platforms, from requirements through production support; AI-assisted development with Claude Code.
- **CI/CD & Observability**: Git, GitHub Actions, Docker, AWS EC2, NGINX, Linux; Prometheus, Grafana, Loki, Sentry - automated delivery and production monitoring.

Professional Experience

Cashbackwallah — **Remote / client project**
Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, React, TypeScript, Express.js, Prisma, PostgreSQL): courier rate comparison, shipment booking, order management, and a multi-level franchise commission system - 1,000+ orders processed.
- Integrated Shiprocket, Razorpay, Firebase OTP, Redis, and Sentry: payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, webhook processing, scheduled refund workflows.
- Handled end-to-end deployment and DevOps for the platform, including production monitoring with Sentry.
- Worked directly with the client on requirements and production issues. Demo: cashbackwallah.com

Dream10.in — **Remote / client project**
Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment and payout processing.
- Built fault-tolerant services for high-concurrency event handling and managed CI/CD deployment, including Redis and RabbitMQ-based processing and real-time WebSocket communication. Demo: dream10.in

Lead Tracking System — **Remote / client project**
Freelance Full-Stack Developer (Ongoing Maintenance) — *May 2023 - Present*

- Built a production affiliate lead-tracking platform in 2023, still maintained and extended on demand: real-time dashboards, automated fraud detection, webhook and postback handling, payment processing, Telegram alerts, and role-based access control.
- Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in
- Continue to own it as a live client engagement: resolving production issues and shipping extensions on request.

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, invite-based collaboration, contest timers, and testcase management.
  - Docker-sandboxed code execution service with customizable coding rooms. Demo: codelab.logicpay.in
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads.
  - Secure file sharing with search, pagination, and folder organization.
- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): task-based earnings, referral system, scratch cards, and automated reward distribution.
  - First end-to-end payment integration built, including payouts through Paytm and OpenMoney. Demo: earningarea.org

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024).
- **4th place** - WebForge (2025).
- **4th place** - Code Arambh (2024).
- **AWS Cloud Computing** - certification, JOVAC (2025).
- **LeetCode** - 1,430 contest rating.
