LinkedIn, GitHub, Portfolio

Full-Stack Developer (React, Next.js, Node.js, TypeScript, PostgreSQL) who builds the internal tooling operations teams work in every day: dashboards, admin panels, role-based access, webhook and payment flows, running in production. Over three years of freelance delivery, maintaining an affiliate lead-tracking platform since 2023 while shipping logistics and real-time quiz products for clients I work with directly. B.Tech CSE (in progress, expected 2027).

Core Competencies

- **Internal Tools & Dashboards**: real-time dashboards, role-based access control, audit-style fraud-detection logging, webhook postbacks, and Telegram alerting on the Lead Tracking platform, maintained in production since 2023.
- **SQL & JavaScript**: PostgreSQL (Prisma), MySQL, MongoDB, and Redis; JavaScript and TypeScript as primary languages across REST, GraphQL, and WebSocket APIs.
- **React & Next.js**: React, Next.js, Tailwind CSS, Material UI, Zustand, TanStack Query - internal dashboards and full customer-facing applications in production.
- **Approval & Payment Flows**: KYC-gated orders, automated payouts, scheduled refund workflows, and wallet ledgers with Razorpay signature verification.
- **Backend & Real-Time**: Node.js, Express.js, RabbitMQ, Redis, and Node.js Cluster for background processing and high-concurrency event handling.
- **CI/CD & Observability**: Docker, GitHub Actions, AWS EC2, NGINX, Linux; Prometheus, Grafana, Loki, Sentry. AI-assisted development with Claude Code.

Professional Experience

Cashbackwallah — **Remote / client project**
Freelance Full-Stack Developer — *Jan 2026 - Aug 2026*

- Built and deployed a production logistics platform from scratch (Next.js, React, TypeScript, Express.js, Prisma, PostgreSQL): courier rate comparison, shipment booking, an order-management console, and a multi-level franchise commission system - 1,000+ orders processed.
- Integrated Shiprocket, Razorpay, Firebase OTP, Redis, and Sentry: payment signature verification, wallet and transaction ledger, KYC-gated orders, automated payouts, webhook processing, scheduled refund workflows.
- Handled end-to-end deployment and DevOps for the platform, including production monitoring with Sentry.
- Worked directly with the client on requirements and production issues. Demo: cashbackwallah.com

Dream10.in — **Remote / client project**
Freelance Full-Stack Developer — *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform to partners (Next.js, React, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, automated payment and payout processing.
- Built fault-tolerant services for high-concurrency event handling and managed CI/CD deployment, including Redis and RabbitMQ-based processing and real-time WebSocket communication. Demo: dream10.in

- **Lead Tracking System** **Remote / client project**
  Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*
  - Built a production affiliate lead-tracking platform in 2023 and still maintain and extend it: real-time operations dashboards, role-based access control, automated fraud-detection logging, webhook and postback handling, payment processing, and Telegram alerts.
  - Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in
  - Continue to own it as a live client engagement: resolving production issues and shipping extensions on request.

Independent Projects

- **Independent project**
  CodeLab *Jun 2025*
  - Collaborative coding platform (Next.js, React, Node.js, Express, Docker, Yjs CRDT, WebSockets): real-time multi-user editing, coding rooms, contest and testcase management, invite-based collaboration.
  - Docker-sandboxed code execution with contest timers and customizable layouts. Demo: codelab.logicpay.in
- **Independent project**
  Data Vault *Mar 2025*
  - Privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API): chunk-based encrypted storage with resumable uploads, secure sharing, search, pagination, and folder organization. Demo: datavault-two.vercel.app
- **Independent project**
  Earning Area *Aug 2021*
  - Gamified rewards platform (PHP, MySQL, Paytm API): task-based earnings, referral system, and automated reward distribution; first end-to-end payment integration. Demo: earningarea.org

Education

- **GLA University** **Mathura, India**
  B.Tech in Computer Science and Engineering *2023-2027*
  In progress, expected 2027. Key topics: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Languages

- Hindi (native), English (professional working proficiency).

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024).
- **4th place** - WebForge (2025); **4th place** - Code Arambh (2024).
- **AWS Cloud Computing** - certification, JOVAC (2025).
- **LeetCode** - 1,430 contest rating.
