Dear Signzy Hiring Team,

I am applying for the Frontend Developer - React.js opening in Bengaluru. Over three years of freelance delivery I have built and shipped production React and Next.js frontends end to end, which is the core of what this role asks for.

Recent work that maps to the role:

- Frontend for a live logistics platform (Cashbackwallah, cashbackwallah.com): a Next.js 16 and TypeScript client integrated against 145 REST endpoints backed by 23 Prisma models, covering courier rate comparison, booking, order management, and a franchise commission flow; 1,000+ orders processed.
- Instant-panel admin dashboards (panel5.logicpay.in, open source): real-time dashboards, fraud alerts, and a role-based access control UI over a 107-endpoint API kept fast by Redis-cached hot reads.
- Real-time UI for Dream10.in: live leaderboards and WebSocket-driven screens wired to automated payment and payout flows.
- Component libraries: an 80-component file manager (Data Vault) and a 63-component personal site.

Your posting asks for strong React.js and JavaScript expertise to build modern, scalable, high-performance web applications with seamless, responsive user experiences. That is the work I have done on every project: I chose the stack, designed the reusable components, and reviewed each change against production consequences before shipping. Delivery ran in short iterations against client feedback. On the logistics platform I built responsive flows for courier comparison, booking, and order tracking; on the lead-tracking panel I shipped data-heavy admin screens with role-based access and Redis-cached reads.

Signzy's focus on scalable, responsive web applications is the kind of frontend ownership I want to bring: clean component architecture, predictable state management with hooks, Zustand, and TanStack Query, and careful integration against REST APIs, with performance handled through caching and sensible loading states.

I am based in Mathura and open to relocating to Bengaluru for the right role.

Kind regards,

Gaurav Chaudhary
