Dear White Orange Hiring Team,

I am applying for the Frontend Developer role at White Orange. Over three years of freelance delivery I have built and shipped production React and Next.js frontends end to end, which is the core of what this role asks for: visually appealing, responsive, and user-friendly web applications.

Recent production work that maps to the role:

- Frontend for a live logistics platform (Cashbackwallah, cashbackwallah.com): a Next.js 16 and TypeScript client integrated against 145 REST endpoints backed by 23 Prisma models, covering courier rate comparison, booking, order management, and a multi-level franchise commission flow with role-based access; 1,000+ orders processed.
- Instant-panel admin dashboards (panel5.logicpay.in, open source): real-time dashboards, fraud alerts, and a role-based access control UI over a 107-endpoint API kept fast by Redis-cached hot reads.
- Real-time UI for Dream10.in: live leaderboards and WebSocket-driven screens wired to automated payment and payout flows.
- Component libraries: an 80-component file manager (Data Vault) and a 63-component personal site, built for reuse and consistency.

Your posting asks for a Frontend Developer to create visually appealing, responsive, and user-friendly web applications, working closely with designers and backend developers to build modern web applications. That is the work I have done on every project: I take a design, break it into reusable components, wire it to REST APIs, and ship responsive layouts that hold up across devices. Delivery ran in short iterations (demo to the client, take feedback, ship the next slice), which keeps the UI aligned with what users and designers actually need.

White Orange's focus on building modern web applications collaboratively is the kind of frontend ownership I want to bring: clean component architecture, predictable state management with hooks, Context API, Zustand, and TanStack Query, careful integration with backend APIs, and responsive design with Tailwind CSS and Material UI.

I am based in Mathura, Uttar Pradesh, and am open to relocation or remote work for the right role. I look forward to hearing from you.

Kind regards,

Gaurav Chaudhary
