Gaurav Chaudhary

Mathura, Uttar Pradesh, India

Phone: +91-8077598311 | Email: gauravmrjatt4@gmail.com | LinkedIn | GitHub | Portfolio

Frontend-focused Full-Stack Developer with over three years of freelance delivery on production React and Next.js platforms. Built and shipped the Next.js client of a live logistics platform integrated against 145 REST endpoints, instant-panel admin dashboards with role-based access control, and real-time UI screens, owning each codebase solo from architecture to deployment, with clean, reviewed code in open-source repositories. Finalist, WebX Frontend Challenge (2024). B.Tech in Computer Science and Engineering, GLA University, in progress, expected 2027.

Education

GLA University **Mathura, India**
B.Tech, Computer Science and Engineering *2023-2027*
In progress, expected 2027. Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Core Competencies

React.js & Next.js: React 19, Next.js 15/16, component lifecycle, hooks, and reusable component architecture; shipped production applications built on reusable component sets of 80 and 63 components | **JavaScript ES6+ & TypeScript:** production codebases in both; asynchronous JavaScript across WebSocket live data, webhook-driven flows, and background queues | **State Management:** hooks and Context API patterns, Zustand, TanStack Query for server state; application-level error scenarios around async data flow | **Responsive web design:** HTML5, CSS3, Tailwind CSS, and Material UI; responsive admin dashboards and consumer-facing layouts | **RESTful API Integration:** production integrations across a 145-endpoint platform and a 107-endpoint admin panel, plus Razorpay, Shiprocket, and Firebase OTP integrations | **Performance & Tooling:** Git, GitHub Actions CI/CD, npm, Docker; Redis caching of hot reads behind the API layer; tracked down production issues via Sentry and Prometheus/Grafana dashboards; kept the instant-panel codebase maintainable across 3+ years of ongoing maintenance

Professional Experience

Cashbackwallah - Remote / client project
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built the production Next.js 16 frontend for a logistics platform (TypeScript client over an Express.js, Prisma, and PostgreSQL backend): courier rate comparison, shipment booking, order management, and a multi-level franchise commission flow; the platform has processed 1,000+ orders. Demo: cashbackwallah.com
- Integrated the client against 145 REST endpoints backed by 23 Prisma models, handling asynchronous data flow, webhook-driven status updates, and application-level error scenarios.
- Implemented role-based access for customers, couriers, and multi-level franchise users, plus wallet, ledger, KYC-gated ordering, payout, and refund screens with Razorpay and payment signature verification.
- Owned the open-source codebase (github.com/Gauravmrjatt/cheapship, about 59,000 lines) end to end, including CI/CD deployment with GitHub Actions.

Dream10.in - Remote / client project
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Shipped the frontend for a production real-time quiz platform: live leaderboards and WebSocket-driven screens under high-concurrency event handling, plus automated payment and payout flows. Demo: dream10.in
- Managed CI/CD deployment and fault-tolerant services (Next.js, Node.js, Redis, RabbitMQ) alongside the real-time client.

Lead Tracking System - Remote / client project
Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*

- Built and continue to maintain a production affiliate lead-tracking platform (github.com/Gauravmrjatt/instant-panel, about 31,000 lines, 107 endpoints): real-time dashboards, automated fraud detection alerts, webhook/postback handling screens, and a role-based access control admin UI. Demo: panel5.logicpay.in
- Kept frequently accessed screens fast with Redis-cached hot reads behind the API, and moved payouts through a RabbitMQ queue so slow operations never block the interface; produced monitoring with Prometheus, Grafana, and Loki, and a 10-file automated test suite.

Selected Projects

- **Data Vault** (Mar 2025): privacy-focused file manager in Next.js with Telegram-backed encrypted storage; 80 UI components. Demo: datavault-two.vercel.app
- **TicketHub**: ticketing app on Next.js 15 and React 19, 16 endpoints and 5 models; live at ticket-hub-ten.vercel.app.
- **CodeLab** (Jun 2025): collaborative coding platform with CRDT-based real-time multi-user editing and a Docker-sandboxed judge; about 32,000 lines with 23 routes. Demo: codelab.logicpay.in
- **EcoFinds** (2025): secondhand marketplace web app; live at eco-finds-sage.vercel.app.
- **Earning Area** (Aug 2021): gamified rewards platform with PHP, MySQL, and the Paytm API; my first end-to-end payment integration.
- **Portfolio**: 63-component personal site in Next.js; gauravmrjatt.vercel.app.
- **School** (Nov 2025 - Present): school management API using Apollo GraphQL with WebSocket subscriptions over 10 Prisma models. Repo: github.com/Gauravmrjatt/School
- **OSM Fortress** (May 2026): gift-code distribution service with proof-of-work gating, anti-scraping layers, and device fingerprints; 66 routes, about 58,000 lines. Repo: github.com/Gauravmrjatt/osm-forest
- **NEET Counsellors** (Jun 2026 - Aug 2026): counselling platform (Next.js, Payload CMS) plus a rule-based college predictor pipeline. Repo: github.com/Gauravmrjatt/neet

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024, frontend challenge by a competitive coding community).
- **4th place** - WebForge (2025, national-level web development competition); **4th place** - Code Arambh (2024).
- **LeetCode** - 1,430 contest rating.

Languages: Hindi (native), English (professional working proficiency).
