Frontend-focused Full-Stack Developer with over three years of freelance delivery on production React and Next.js platforms, building responsive, component-driven interfaces for consumer and admin surfaces. React 19 and TypeScript as the primary stack, with Tailwind CSS and Material UI across devices, reusable component libraries of 80, 63 and 45 components, and a 10-file automated test suite on a live platform. B.Tech CSE in progress, expected 2027.

Education

GLA University **Mathura, India**
B.Tech, Computer Science and Engineering *2023-2027*
In progress, expected 2027. Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Core Competencies

React & Next.js: React 19, Next.js 15/16, hooks, component lifecycle, client routing, code splitting, reusable component libraries (80, 63, 45 components) | **JavaScript & TypeScript:** modern JavaScript (ES6+) and TypeScript as primary languages across all shipped codebases, typed props and API contracts | **UI/UX & Responsive Design:** semantic HTML5, CSS3, Tailwind CSS, Material UI; multi-device responsive layouts; user-friendly interfaces | **State Management:** Zustand, TanStack Query, React Context, hooks; client-side state and server-state caching patterns | **Unit Testing:** automated unit tests and integration suites on production repos (10-file suite on Instant Panel); CI/CD with GitHub Actions | **REST API Integration:** production integrations across 145 and 107 REST endpoints; Postman contract checks; async data flow and error handling | **Performance & Tooling:** Git, GitHub Actions CI/CD, Docker, Redis caching; Sentry and Prometheus/Grafana for production debugging; LeetCode 1,430

Professional Experience

Cashbackwallah - Remote / client project
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built the production frontend in Next.js 16 and TypeScript for a logistics platform (1,000+ orders processed): courier rate comparison screens, shipment booking flows, order tables with filters and pagination, and franchise commission dashboards. Demo: cashbackwallah.com
- Integrated the React client with a 145-endpoint Express backend: wallet and transaction ledger views, payout and refund status screens, and explicit loading, empty, and error states against live payment flows.
- Managed client state and shared component patterns across customer, franchise, and admin tiers, with Firebase OTP and JWT protected routes and role-differentiated views.
- Owned the open-source codebase (github.com/Gauravmrjatt/cheapship, about 59,000 lines) end to end, including CI/CD deployment with GitHub Actions.

Dream10.in - Remote / client project
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Shipped the real-time quiz frontend in Next.js and JavaScript for partner platforms: live leaderboards streamed over WebSockets, question timers, answer flow states, anti-cheat surfaces, and result screens. Demo: dream10.in
- Tuned the update path for high-concurrency events so score panels stayed consistent and interactive; owned CI/CD deployment and production debugging.

Lead Tracking System - Remote / client project
Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*

- Originally built in 2023 and still maintain the interfaces of an affiliate lead-tracking platform: real-time dashboards, lead tables with filters, automated fraud-detection views, webhook/postback status screens, and Telegram alert settings. Demo: panel5.logicpay.in
- Built role-based access control views for admin, partner, and client tiers, so the same data layer renders different permitted surfaces without duplicated components.
- Maintain a 31,000-line open-source codebase (107 endpoints) with a 10-file automated test suite, Redis-cached hot reads, and Prometheus/Grafana/Loki monitoring. github.com/Gauravmrjatt/instant-panel

Selected Projects

- **Data Vault** (Mar 2025): privacy-focused file manager in Next.js, an 80-component build with encrypted chunked storage, resumable upload progress, secure sharing, search, pagination, and folder organisation. Demo: datavault-two.vercel.app
- **CodeLab** (Jun 2025): browser code editor with CRDT-based real-time multi-user editing (Yjs), customizable layouts, contest timers, and invite-based collaboration rooms over WebSockets; about 32,000 lines. Demo: codelab.logicpay.in
- **TicketHub and EcoFinds**: TicketHub in Next.js 15 with React 19 (16 endpoints, 5 models) and EcoFinds, a live marketplace front end, both built as component-first responsive interfaces.
- **Portfolio** (2025): personal site in Next.js with a 63-component library, responsive navigation, project case studies, and contact flows. Live: gauravmrjatt.vercel.app
- **Tod AI** (2025): task and note-taking app with a 45-component interface, optimistic updates, and keyboard-first interactions.
- **NEET Counsellors** (Jun 2026 - Aug 2026, dates from GitHub; client/ownership confirmation pending): counselling platform in Next.js and Payload CMS with a rule-based college predictor UI (rank, category, quota to college list). Repo: github.com/Gauravmrjatt/neet
- **OSM Fortress** (May 2026): gift-code distribution service with proof-of-work gating, anti-scraping layers, and device fingerprints; 66 routes, about 58,000 lines. Repo: github.com/Gauravmrjatt/osm-forest

Honors and Awards

- **Finalist** - WebX Frontend Challenge (2024), a frontend competition run by a competitive coding community.
- **4th place** - WebForge (2025), national-level web development competition; **4th place** - Code Arambh (2024).
- **AWS Cloud Computing Certification** - JOVAC, GLA University and Technical Guftgu (2025); **LeetCode** - 1,430 contest rating.
- **Open Source**: maintains two production platforms (cheapship: 59,000 lines, 145 endpoints; instant-panel: 31,000 lines, 107 endpoints) on GitHub.

Languages: Hindi (native), English (professional working proficiency).
