Gaurav Chaudhary

Mathura, Uttar Pradesh, India

Phone: +91-8077598311 | Email: gauravmrjatt4@gmail.com | LinkedIn | GitHub | Portfolio

Full-Stack Developer who builds and ships product features end to end across web, backend APIs, and data, working solo. Three production platforms shipped and maintained over the last three years: a 145-endpoint logistics app processing 1,000+ orders, a real-time quiz platform, and a 107-endpoint lead tracking system with tests, queues, and monitoring. B.Tech CSE (expected 2027), LeetCode 1,430 contest rating. Open to relocation; comfortable working in person in Jayanagar, Bengaluru.

Education

GLA University **Mathura, India**
B.Tech, Computer Science and Engineering *2023-2027*
In progress, expected 2027. Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Core Competencies

Full-Stack Product: Next.js, React, TypeScript, Node.js, Express.js; complete user flows from frontend through API to database, shipped and maintained in production | **Backend APIs and Data:** REST, Apollo GraphQL with WebSocket subscriptions, PostgreSQL, MongoDB, Prisma; schema and query design for payments, orders, and event data | **Caching, Queues, Real-Time:** Redis-cached hot reads, RabbitMQ payout queues, Kafka event streaming, WebSockets, Node.js Cluster | **Tests and Self-Review:** automated test suites in production repos, Sentry error tracking, Prometheus/Grafana/Loki dashboards and alerts | **Deployment and CI/CD:** Docker, GitHub Actions, NGINX, AWS EC2, Linux; end-to-end deployment ownership on every project

Professional Experience

Cashbackwallah - Remote / client project
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built and shipped a production logistics platform from scratch (Next.js, TypeScript, Express.js, Prisma, PostgreSQL): 1,000+ orders processed on the live app. Demo: cashbackwallah.com
- Owned every layer: web frontend, backend APIs (145 endpoints), data models (23 Prisma models), and deployment; integrated Razorpay (payment signature verification), Shiprocket, Firebase OTP, Redis, and Sentry.
- Turned product intent into complete flows for rate comparison, booking, orders, wallets, and a multi-level franchise commission system, with webhook processing and scheduled refund workflows covering the money-edge cases.
- Open source at github.com/Gauravmrjatt/cheapship: about 59,000 lines, TypeScript across the client and the API.
- Implemented KYC-gated orders, wallet and transaction ledger, automated payouts, and scheduled refund workflows; handled end-to-end deployment and DevOps.

Dream10.in - Remote / client project
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Developed and shipped a production real-time quiz platform to partners (Next.js, Node.js, Redis, RabbitMQ, WebSockets): live leaderboards, anti-cheat mechanisms, and automated payment and payout processing.
- Built fault-tolerant services for high-concurrency event handling and managed CI/CD deployment. Demo: dream10.in

Lead Tracking System - Remote / client project
Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*

- Built a production affiliate lead-tracking platform in 2023 and continue to maintain and extend it: real-time dashboards, automated fraud detection, webhook/postback handling, payment processing, Telegram alerts, and role-based access control.
- Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki. Demo: panel5.logicpay.in
- The open-source repo (github.com/Gauravmrjatt/instant-panel) holds about 31,000 lines with 107 endpoints, Redis-cached hot reads, a RabbitMQ-based payout queue so slow payouts never block requests, and a 10-file test suite.

Selected Projects

- **School** (Nov 2025 - Present): school management API using Apollo GraphQL with WebSocket subscriptions over 10 Prisma models; Kafka carries attendance, exam-result, and payment events, Redis pub/sub fans results out. Repo: github.com/Gauravmrjatt/School
- **CodeLab** (Jun 2025): collaborative coding platform with a Docker-sandboxed judge running Node, Python, Java, and C++ submissions, CRDT-based real-time multi-user editing over WebSockets, and contest management; about 32,000 lines. Demo: codelab.logicpay.in
- **Data Vault** (Mar 2025): privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API) with chunk-based encrypted storage, resumable uploads, and 80 reusable components. Demo: datavault-two.vercel.app
- **TicketHub** (2025): Next.js 15 + React 19 ticketing app with 16 endpoints and 5 Prisma models. Demo: ticket-hub-ten.vercel.app
- **EcoFinds** (2025): marketplace (Next.js, React) - live at eco-finds-sage.vercel.app
- **Earning Area** (Aug 2021): gamified rewards platform (PHP, MySQL, Paytm API) with task-based earnings, referrals, and automated payouts; first end-to-end payment integration. Demo: earningarea.org
- **NEET Counsellors** (Jun 2026 - Aug 2026): counselling platform (Next.js, Payload CMS) plus a rule-based college predictor pipeline (rank, category, quota to college list). Repo: github.com/Gauravmrjatt/neet
- **OSM Fortress** (May 2026): gift-code distribution service with proof-of-work gating, anti-scraping layers, and device fingerprints; 66 routes, about 58,000 lines. Repo: github.com/Gauravmrjatt/osm-forest

Honors and Awards

- **AWS Cloud Computing Certification** - JOVAC, GLA University & Technical Guftgu (2025).
- **Finalist** - WebX Frontend Challenge (2024); **4th place** - WebForge (2025); **4th place** - Code Arambh (2024).
- **LeetCode** - 1,430 contest rating.

Languages: Hindi (native), English (professional working proficiency).
