Gaurav Chaudhary

Mathura, Uttar Pradesh, India

Phone: +91-8077598311 | Email: gauravmrjatt4@gmail.com | LinkedIn | GitHub | Portfolio

Frontend-leaning Full-Stack Developer with over three years of freelance delivery, specializing in production React.js and Next.js applications: TypeScript, REST API integration, reusable component architecture, and transaction-style interfaces (wallets, ledgers, order and commission dashboards). Built a Next.js 16 production client integrated with 145 backend endpoints (cashbackwallah.com) and role-based admin platforms. Comfortable with Zustand, TanStack Query, Tailwind CSS, and Material UI. B.Tech CSE, GLA University (in progress, expected 2027).

Education

GLA University **Mathura, India**
B.Tech, Computer Science and Engineering *2023-2027*
In progress, expected 2027. Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.

Core Competencies

Languages: TypeScript, JavaScript, Python, Java, SQL, PHP | **Frontend:** React 19, Next.js 15/16, React Hooks, component libraries (80-component file manager, 63-component portfolio), Zustand, TanStack Query, Tailwind CSS, Material UI, responsive design, cross-browser compatibility | **Backend:** Node.js, Express.js, REST API integration, JWT, Auth0, Firebase OTP, webhook/postback handling, API caching, invalidation, optimistic updates | **Data:** PostgreSQL (primary), MySQL, MongoDB, Redis; Prisma, Mongoose, Zod | **DevOps & Cloud:** Docker, NGINX, GitHub Actions CI/CD, AWS EC2, Linux, Coolify | **Testing & Observability:** automated test suites, Sentry, Prometheus, Grafana, Loki, Postman, production debugging

Professional Experience

Cashbackwallah - Remote / client project
Freelance Full-Stack Developer *Jan 2026 - Aug 2026*

- Built the production frontend in Next.js 16 and TypeScript for a logistics platform (1,000+ orders processed): courier rate comparison, shipment booking flows, order management with tables and filters, and franchise commission dashboards. Demo: cashbackwallah.com
- Integrated the frontend with a 145-endpoint Express.js backend: wallet and transaction ledger views, KYC-gated order steps, Razorpay payment flows (signature verification), and payout/refund status screens with proper loading and error states.
- Built role-aware interfaces for customers, franchise tiers, and admins, with protected routes and Firebase OTP authentication.
- Open source: github.com/Gauravmrjatt/cheapship; owned deployment end to end.

Dream10.in - Remote / client project
Freelance Full-Stack Developer *Mar 2025 - Nov 2025*

- Shipped a production real-time quiz platform (Next.js, Node.js, Redis, RabbitMQ, WebSockets): live leaderboard UIs fed by WebSocket updates, anti-cheat surfaces, and automated payment/payout processing. Demo: dream10.in
- Built high-concurrency event services and managed CI/CD deployment for the platform.
- Owned the real-time delivery path to partner integrations and maintained the platform in production.

Lead Tracking System - Remote / client project
Freelance Full-Stack Developer (Ongoing Maintenance) *May 2023 - Present*

- Built and maintain an affiliate lead-tracking platform with role-based access control: real-time dashboards, fraud detection views, webhook/postback handling, payment processing, and Telegram alerts. Demo: panel5.logicpay.in
- Open-source codebase (31,000 lines, 107 endpoints): github.com/Gauravmrjatt/instant-panel; Redis-cached hot reads and a RabbitMQ payout queue so slow payouts never block requests.
- Scaled background processing with RabbitMQ, Redis, and Node.js Cluster; implemented production monitoring with Prometheus, Grafana, and Loki.

Selected Projects

- **Data Vault** (Mar 2025): privacy-focused file manager (Next.js, Node.js, MongoDB, Telegram Bot API) with 80 reusable components, encrypted resumable uploads, search, pagination, and folder UI. Demo: datavault-two.vercel.app
- **CodeLab** (Jun 2025): collaborative coding platform with WebSockets, CRDT-based multi-user editing, and a Docker-sandboxed judge; about 32,000 lines. Demo: codelab.logicpay.in
- **School** (Nov 2025 - Present): school management API using Apollo GraphQL with WebSocket subscriptions over 10 Prisma models. Repo: github.com/Gauravmrjatt/School
- **TicketHub** (2025): Next.js 15 + React 19 ticketing app with 16 endpoints and 5 Prisma models. Demo: ticket-hub-ten.vercel.app
- **EcoFinds** (2025): marketplace (Next.js, React) - live at eco-finds-sage.vercel.app
- **OSM Fortress** (May 2026): gift-code distribution service with proof-of-work gating, anti-scraping layers, and device fingerprints; 66 routes, about 58,000 lines. Repo: github.com/Gauravmrjatt/osm-forest
- **NEET Counsellors** (Jun 2026 - Aug 2026): counselling platform (Next.js, Payload CMS) plus a rule-based college predictor pipeline (rank, category, quota to college list). Repo: github.com/Gauravmrjatt/neet
- **Earning Area** (Aug 2021): gamified rewards platform (PHP, MySQL, Paytm API) with task-based earnings, referrals, and automated payouts; first end-to-end payment integration. Demo: earningarea.org

Honors and Awards

- **AWS Cloud Computing Certification** - JOVAC, GLA University & Technical Guftgu (2025).
- **Finalist** - WebX Frontend Challenge (2024); **4th place** - WebForge (2025); **4th place** - Code Arambh (2024).
- **LeetCode** - 1,430 contest rating.
- **Open Source**: maintains two production platforms (cheapship: 59,000 lines, 145 endpoints; instant-panel: 31,000 lines, 107 endpoints) on GitHub.
- **Web Development Competitions**: 4th place - WebForge (2025, national-level); 4th place - Code Arambh (2024, intra-college).

Languages: Hindi (native), English (professional working proficiency).
